**UNDERFYRE TECHNOLOGY**

**FYRE-TECX**

#### LIFETIME FLAME RESISTANCE

**FYRE-TECX** is manufactured using a proprietary blend of flame resistant chemicals. Our process ensures that our knitted cotton and cotton-blend fabrics are flame resistant for the life of the garment. Even after intense exposure and up to 100 industrial launderings, **FYRE-TECX** continues to protect while maintaining its integrity and appearance.

#### MOISTURE MOVEMENT PERFORMANCE WEAR

In addition to its great FR qualities, **FYRE-TECX** is breathable, light-weight cotton with state of the art moisture wicking technology. **FYRE-TECX** controls your core temperature by moving moisture away from your body to the surface of the fabric where it can dissipate into the air.

#### LOWEST FORMALDEHYDE LEVELS IN THE MARKET

Our unique flame resistant application process results in fabrics that contain extremely low formaldehyde levels.

You don't have to sacrifice comfort to gain the superior protection that only **FYRE-TECX** can provide.

**FYRE-TECX's** FR qualities and moisture movement technology in cotton makes it the best non-flammable performance FR wear in the market.

NFPA 70E HRC 1 compliant:  
4.2 oz/yd<sup>2</sup> Ringspun Combed Cotton Jersey  
Arc Rating - ASTM 4.0 cal/cm<sup>2</sup>
